ABSTRACT

Data from the "Graduate Programs and Admissions Manual, 2nd Edition" published by the Graduate Record Examination Board and the Council of Graduate Schools in September 1973 are presented in tabular form to summarize information about graduate programs offered in all higher education institutions in the United States. This summary is based on data collected through questionnaire responses from all U.S. institutions awarding Master's degrees or higher. A separate summary is tabulated for 79 graduate programs and for 10 traditional groups into which the 79 programs were divided. For each program, responses are summarized for all institutions (classified by size) listed as offering that program and are also presented in categories based on number of degrees awarded, and program size including number of faculty, number of students, and number of financial aid awards. A SUMMARY OF DATA FROM THE GRADUATE PROGRAMS AND ADMISSIONS MANUAL, 2nd EDITION

GRE Board Research Project #74-1

Introduction

The creation of the Graduate Programs and Admissions Manual by the GRE Board and the Council of Graduate Schools in 1972 represented the first large-scale attempt to collect and distribute detailed factual information on both master's and doctoral degree programs offered by individual institutions in all fields of study. Although the primary purpose of the Manual is to assist prospective graduate students in their initial screening of possible graduate programs, it also represents a unique collection of information on American graduate education. The project reported here was undertaken in order to summarize information about programs across all institutions and to make the summaries available to the graduate community. In order to provide for maximum dissemination of the Summary of Data, this report may be reproduced, in whole or in part, without the permission of the publisher.

The Data

The data on which these summaries are based are those which first appeared in the 2nd edition of the Manual[1], published in September 1973, and pertain primarily to the 1972-73 academic year. Questionnaires -- distributed in November 1972 to all institutions in the United States awarding a master's degree or higher -- provided for collection of data both for the institution's graduate school as a whole and for each individual program as defined by a taxonomy derived from the HEGIS taxonomy and refined by the Editorial Board of the Manual. Data were collected from institutions through March 1973 and were entered into the Manual without editing (except for occasional reclassification to conform to the taxonomy); the occasional apparent inconsistencies in data in the Manual have not been modified for this summary. The 2nd edition of the Manual includes data from 486 institutions, of which 258 were members of the Council of Graduate Schools. At the time that the data were collected, the 303 members of the Council awarded 85% of all master's degrees and 98% of all doctorates in the United States.

---

[1] Although the 1st edition of the Manual was published in 1972, the condition of the data on the tape from which that edition was created suggested that more useful summaries could be derived from the tape for the 2nd edition.

The Summary

A separate summary is provided for each of the 79 programs listed in Section II of the Graduate Programs and Admissions Manual. In addition, summaries are provided for 10 traditional program groups into which the 79 programs have been divided as well as for special and interdisciplinary programs in biological and physical sciences, general liberal arts and science, engineering and other disciplines, and humanities and social sciences from the Manual's Section III. Institutional data, which appeared in Section I of the Manual, have not been included since similar data are already available in other reports (such as the annual Survey of Graduate Enrollment conducted by the GRE Board and the Council of Graduate Schools) in a more appropriate and timely fashion. With the exception of data concerning the availability of tuition scholarships and of loans, the number of subfields offered within a program, and departmental prerequisites for admission, all program data from Section II have been included in these summaries.

For each program, responses have been summarized for all institutions listed as offering that program, and have also been presented in categories based upon highest degree awarded and program size. It should be noted that classification as "master's" or "doctorate" within a given program is dependent upon the highest degree offered by an institution in that specific program, regardless of whether or not the institution offers higher degrees in other programs. (The occasional appearance of data concerning doctorates in a program classified as "master's highest" is presumed to be the result of either a discontinued program or an incorrect institutional data entry.) In those few cases in which Manual entries indicated an intermediate degree, these data have been included with those for master's degree programs. Within the categories of "master's" or "doctorate," each institution is further classified as "large" (above the median graduate school enrollment for that program and degree category) or "small" (below the median graduate school enrollment for that program and degree category); where there was an odd number of institutions in a degree category, the institution at the median is classified as "small."

The first column in the summary tables shows the total number of institutions listed in the Manual that fall into each degree and size category, while the second column shows the total number of states in which those institutions are located. Three rows of information are shown for each size and degree category of institutions. The first row presents the sum of all numeric responses to a particular question (e.g., the total number of master's degrees awarded or total number of financial aid awards given at "large master's" or "small doctorate" institutions), while the second row shows the median responses for that question. The third row shows the number of institutions responding to that particular question (e.g., how many of the total number of institutions shown in the first column provided responses for the specific question concerning number of master's degrees, or number of faculty, or number of financial aid awards). When the number of institutions

responding to a particular question is odd, the median computed for the second row is the middle value; when the number of institutions responding to a particular question is even, the median computed for the second row is the average of the two middle values, rounded up.

At the bottom of each page, responses for all institutions offering that program are summarized. In these summaries, the total numeric response, the median response, and the number of institutions responding to that question are once again shown; in addition, the numbers above which and below which 12 1/2 percent of all responses have fallen are shown as an indication of the range of responses. (In Table 08, where only three institutions have provided data, the 87.5 percentile is given as the highest of the three values and the 12.5 percentile as the lowest). Use of these upper and lower eighths -- as opposed to presentation of the maximum and minimum numeric responses -- provides additional stability to this indication of range and is less subject to influence by extreme cases at the top or bottom than is use of maximum and minimum values.

In reviewing the Manual itself, readers will note a number of blank responses for particular programs and questions. In preparing this summary, blank entries in the Manual were treated as "no response" in all columns concerning number of degrees awarded and number of financial aid awards; in this case, the number of institutions shown in the "institutions responding" row was reduced accordingly. Blank entries were treated as "zero" in all columns concerning the number of students, and the "institutions responding" is thus equal to the "number of institutions" listed in the Manual. Finally, blanks for number of faculty were treated as "zero" in cases in which either the "Full-time" faculty or "Part-time" faculty column had an entry and the other was blank; where both columns were blank, the blanks were treated as "no response."

Finally, summary data in each of the 10 summaries for traditional program groups (e.g., Table 45: "All Humanities" and Table 62: "All Engineering") have been created by summing responses across all programs in that group, a process which gives each number slightly different meaning from those which appear in the summaries of the 79 basic programs. For example, in Table 45, the entry of 352 for "Number of Institutions" in the "Master's - large" category refers not to the number of institutions offering one or more programs in the humanities but to the total number of separate large programs leading to the master's degree offered in the humanities by all institutions for which data are available. Each program has been defined as "large" or "small" according to its original classification when it was summarized with other programs in, for example, French, philosophy, or religion. Continuing this example, these programs are offered in 49 separate states and, based on responses from 348 of the 352 programs, awarded 11,703 master's degrees in the period 1969-1972. The median number of degrees awarded in these 348 large master's degree programs in the humanities was twenty-two.

To order the 2nd edition of the Graduate Programs and Admissions Manual, from which these summaries were generated, or the 3rd edition of the Manual, which contains data for 1973, please write to Mr. George Fremon, Educational Testing Service, Princeton, N.J. 08540. When ordering, please indicate which volume(s) and edition(s) you wish. Volumes include data on the following programs:

Volume A: Biological Sciences, Health Sciences, and Related Fields

Volume B: Arts and Humanities

Volume C: Physical Sciences, Mathematics, and Engineering

Volume D: Social Sciences and Education

Please also enclose a check payable to the GPAM for the appropriate volume(s) ordered, and note that 2nd edition volumes are $3.00 each while 3rd edition volumes are $3.50 each.
